

**ST. THOMAS SCHOOL, LONI**  
**CBSE SCIENCE EXHIBITION**  
**SESSION 2023-24**

**“Technology can become wings, that can allow educational world to fly faster and further”. – Jenny Aarledge**

Science exhibitions play an important role in encouraging students to be inquisitive and think analytically. They ignite curiosity and offer chances for students to engage in inquiry-based learning. It allows them to explore hypotheses and find answers on their own.

Our school Participated in CBSE Science exhibition, session 2023-24 held from 10<sup>th</sup> December 2023 to 13<sup>th</sup> December 2023 at St. Teresa School, Indirapuram for the group VI to VIII class.

Anmol Jain and Neerav of class 8A presented a model of Device to reduce carbon in the atmosphere by using KOH, under the guidance of Ms. K Sweta the science teacher.

Our students were appreciated for their efforts taken and work presented by the CBSE panel. These initiatives helped students to explore more and get to know about different innovations, technologies being developed in the recent world. These activities improve the scientific blend in the student's vision and help them to focus upon improvising and upliftment required in present environment for the betterment of the world. It also helped the students to interact with various other children from different schools.
