

ANNUAL REPORT 2019-20

**“Knowledge is power.
Information is liberating.
Education is the premise of progress, in every society, in every family.”
– Kofi Annan**

With these thoughts in mind we, the team at St. Thomas Loni stands in unison to provide conducive environment and holistic approach in grooming the future of our students.

We take immense pleasure to present this factual document of our school to appraise you all about the vision and working of our school since its inception in the year 2018.

With the completion of two years of our journey together, we have travelled on the rough roads, met challenging incidents, and crossed various targets.

We have reached this point in time to announce the various learning experiences which taught us to become more effective and efficient. Lot of lovely memories in this journey of learning with our beloved students and friendly colleagues tickle our hearts which make us feel immensely happy and proud.

In the voyage of discovery of excellence- in the field of education, we begin with 145 students but in the academic year 2019-20,301 more students joined the family.

Effective, experienced and compassionate teaching team is our strength. They are the pillars of support to implement our motto: “Light to Enlighten” by focusing on the overall development of the child and inculcate human values.

The infrastructure of the School is fully equipped with massive and aesthetic building structure, well-ventilated and spacious classrooms, digitally equipped learning methods, green meadows, activity rooms, basketball court and cricket net practice area.

Labs and libraries, display boards to help visual learning and many more that children experience with lot of enthusiasm and curiosity.

Safety of the students being the utmost priority, Cameras are installed all around the School, to keep the whole campus under safe surveillance. In the month of December 2019, we inaugurated the Senior wing of our school further extending the educational architectural space.

There is special emphasis for an all-round personality development which is extremely essential in today’s competitive environment. We also feel that the initial tender years need extra care and children need to spend an adequate amount of time in school.

It has been a priority at St. Thomas to provide a stimulating learning environment for an all-round development of its students. Activities and Digital Class converts the classroom into a learning hub.

Competitions, activities and special assemblies organized offer opportunities for students to learn the values of team work, individual and group responsibility and the sense of culture and community.
