

ST. THOMAS SCHOOL, LONI
SPECIAL ASSEMBLY- Mathematics Week-(Inaugural Day)
CLASSES-VI-VIII

The students of classes VI-VIII organised a virtual special assembly to Inaugurate mathematics Week. The theme of the special assembly was *“Mathematics-Its Limit does not exist”*.

Students of class VI presented Mathematical assembly with a Mathematical prayer, thought, word of the day and News followed with a speech on importance of Mathematics as a subject.

To highlight the contribution of Indian mathematicians in the field of Mathematics, students of class VII gave a presentation on Indian Mathematicians.

“Maths is everywhere” This statement was well justified by the students of class VIII, by integrating the subject with Music, Art, Dance, Nature and Sanskrit.

The importance of mathematical skills are important for a wide array of analytical, technological, scientific, economic and soft skill applications. In order to develop these skills, ST. Thomas School, Loni is celebrating Virtual Maths week from 17th December 2020 to 21st December 2020.

The assembly was concluded with the objectives to encourage the young learners to get involved, dispel Math phobia and create love for the subject.
